

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT OF THE TRUSTEES.

THE BOSTON CITY HOSPITAL,
BOSTON, January 31, 1907.

HON. JOHN F. FITZGERALD,

Mayor of the City of Boston :

SIR, — The Trustees of The Boston City Hospital, in compliance with the Ordinances, respectfully present herewith the forty-third annual report of the Hospital Department for the year beginning February 1, 1906, to January 31, 1907, inclusive. The Hospital Department consists of the main Hospital, the South Department for infectious diseases, the Relief Station in Haymarket square and the Convalescent Home in Dorchester.

HOSPITAL PROPER.

PRINCIPAL STATISTICS, 1906-1907.

NUMBER OF PATIENTS.

Number of patients remaining in the Hospital January 31, 1906	416
Admitted from February 1, 1906, to January 31, 1907, inclusive :	
Medical	3,592
Surgical	4,414
Gynæcological	1,157
Ophthalmic	145
Aural	153
	<hr/> 9,461
Treated during the year	9,877
Discharged during the year	8,257
Died during the year	1,159
	<hr/> 9,416
Number of patients remaining in the Hospital January 31, 1907	461

Largest number of patients in the Hospital at any one time	504
Smallest number of patients in the Hospital at any one time	379
Daily average number of patients	448
Average number of days' stay of patients	16 $\frac{5}{16}$
Number of patients accidentally injured, admitted	704
Number of weeks' treatment given in Hospital	23,334
Number of days' treatment given in Hospital	163,337
Number of applicants for admission to Hospital	12,003
Number of applicants rejected	2,542
Number of patients treated in Out-Patient Departments,	37,938
Number of visits made by out-patients	124,577
Patients carried in ambulances	4,125

Number of out-patients treated in the Out-Patient Departments, classified according to diseases:

For medical diseases	5,605
“ surgical diseases	18,363
“ diseases of the eye	2,204
“ “ ear	1,139
“ “ skin	1,685
“ “ of women	946
“ “ of the nervous system	576
“ “ throat	2,510
“ X-Ray treatment	89
Surgical out-patients treated in the accident rooms, and not elsewhere included	4,821
Total number of out-patients	<u>37,938</u>

Present Capacity of the Hospital Departments.

The schedule of beds is as follows:

Hospital proper	585
South Department	264
Relief Station	20
Convalescent Home	36
Total	<u>905</u>

The distribution of the beds in the main department is as follows :

	WARD.		PRIVATE.		Total.
	Male.	Female.	Male.	Female.	
Surgical.....	167	104	21	17	309
Medical.....	113	79	8	7	207
Gynæcological.....		51	2	53
Ophthalmic and Aural.....	7	9	16
Totals.....	287	243	29	26	585

STATISTICS OF PATIENTS ACCORDING TO SERVICES, FEBRUARY 1, 1906,
TO JANUARY 31, 1907, INCLUSIVE.

SERVICES.	In Hospital, Feb. 1, 1906.	Admitted.	Discharged.	Died.	Total Discharged and Died.	In Hospital, Feb. 1, 1907.
First Surgical.....	72	1,454	1,341	110	1,451	75
Second Surgical.....	72	1,508	1,388	119	1,507	73
Third Surgical.....	70	1,452	1,304	143	1,447	75
First Medical.....	47	1,305	1,044	250	1,294	58
Second Medical.....	45	1,098	869	220	1,089	54
Third Medical.....	46	1,189	956	226	1,182	53
Gynæcological.....	48	1,157	1,063	83	1,146	59
Ophthalmic.....	3	145	139	2	141	7
Aural.....	13	153	153	6	159	7
Totals.....	416	9,461	8,257	1,159	9,416	461

The maximum number of patients in the Hospital proper at any time was 504, and the minimum number 379.

The daily average number of patients was 448. The total number of patients treated in the wards was 9,877.

RECEIPTS AND EXPENDITURES.

Receipts.

City Appropriation	\$485,000 00
Interest from Trust Funds	2,034 22
	<hr/>
	\$487,034 22
	<hr/>

Expenditures.

Hospital proper	\$345,951 87
South Department	95,725 12
Relief Station	35,854 14
Convalescent Home	9,465 09
New buildings	38 00
	<hr/>
	\$487,034 22
	<hr/>

The entire expenditures for all departments of the Hospital during the fiscal year were \$487,034.22. Of this amount \$315,785.53 was expended upon the Hospital proper; \$95,725.12 on account of the South Department; \$15,477.72 on account of the nine Out-Patient Departments; \$9,785.20 on account of the Pathological Department; \$4,440.74 on account of the X-Ray Laboratory and Photographic Department; \$35,854.14 on account of the Relief Station; \$9,465.09 for the Convalescent Home; \$38 on account of new buildings, and \$462.68 on account of determining the settlement of non-paying patients.

To the amount expended for the Hospital proper, \$315,785.53 (see Table No. 1 in Superintendent's Report), there should be added the difference in the amount of stock on hand February 1, 1907, which was \$8,173.61 less than on January 1, 1906. There should be deducted \$451.89 for card cataloguing clinical records; \$1,203.16 for printing the Hospital History, and \$1,646.85 for new watch clock, including new wiring, making the total amount properly chargeable as the expenditures for maintenance of the main Hospital for the year \$320,657.24. This sum was expended for 23,334 weeks'

the tax levy of the city, makes the problem an entirely different one from that of a private or incorporated hospital. Free treatment of persons fairly able to pay a small fee to a physician is the first step towards pauperism; it is unfair in the expenditure of our appropriation, and an injustice to the physicians in private practice, especially the younger ones. Gratuitous and indiscriminate giving leads to excess; and perhaps too rigid restriction might be unfair to the worthy poor."

SOUTH DEPARTMENT.

The principal statistics for the South Department for infectious diseases for the year February 1, 1906, to January 31, 1907, are as follows:

Number of patients remaining in the South Department January 31, 1906	257
Admitted from February 1, 1906, to January 31, 1907, inclusive	2,218
Treated during the year	2,475
Discharged during the year 2,029	
Died during the year 173	
	<hr/> 2,202
Number of patients remaining January 31, 1907	273
Maximum number of patients at any one time	285
Minimum number of patients at any one time	131
Daily average number of patients	218
Average number of days' stay of patients	32
Number of days' treatment given patients	79,532
Number of weeks' treatment given patients	11,362
Number of applicants for admission	2,940
Number of patients rejected	722
Patients carried in ambulances	1,920
Number of patients admitted over fifteen years of age	413
Number of patients dying within forty-eight hours of admission	54
Average age of patients	9
Percentage of deaths to total number of patients for the year	6.9
Percentage of deaths to discharges	7.8

The death rate from diphtheria for the year ending January 31, 1907, was	8.99
The death rate from diphtheria, deducting deaths within twenty-four hours of admission, for the year ending January 31, 1907	7.17
Number of days' board given persons	118,892
Number of weeks' board given persons	16,985
Total expenditures	\$95,725.12
Average weekly cost per patient	\$8.34

The expenditure upon this department has been \$95,725.12. If from this is deducted the difference in the amount of the stock on hand at the beginning and close of the year, which was \$1,006.15 more at the end of the year, it would give \$94,718.97. This sum was expended upon 2,475 patients, and, divided by 11,362 weeks' board, gives \$8.34 as the per capita cost per week. The cost of subsistence supplies was \$24,709.22; the total weeks' board for an average of 325 persons was 16,985. This gives a weekly cost per person for uncooked food supplies of \$1.45 per week, or 21 cents per day. This very small average cost is explained by the fact that 81 per cent. of the patients are children. There will be found on pages 51 to 53, inclusive, a detailed account of the expenditures of this department in the various sub-divisions, which are kept on the same general plan as the Hospital proper.

The most important occurrence of the year is the unusually large epidemic of scarlet fever. More cases of scarlet fever were reported to the Board of Health than in any year since 1893. The demand for admission was larger than for any previous year in the history of the South Department. The wards were crowded to the fullest capacity, and beyond proper hygienic conditions. Finally, no more patients could be admitted, and to meet the demand for the treatment of these cases the Board of Health, at considerable expense, cared for these patients at the Southampton-street Hospital, originally built for a hospital for cholera, but never used for that purpose.

There has been a marked increase in the amount of sickness among the nurses by reason of contact with infectious

the tax levy of the city, makes the problem an entirely different one from that of a private or incorporated hospital. Free treatment of persons fairly able to pay a small fee to a physician is the first step towards pauperism; it is unfair in the expenditure of our appropriation, and an injustice to the physicians in private practice, especially the younger ones. Gratuitous and indiscriminate giving leads to excess; and perhaps too rigid restriction might be unfair to the worthy poor."

SOUTH DEPARTMENT.

The principal statistics for the South Department for infectious diseases for the year February 1, 1906, to January 31, 1907, are as follows:

Number of patients remaining in the South Department January 31, 1906	257
Admitted from February 1, 1906, to January 31, 1907, inclusive	2,218
Treated during the year	2,475
Discharged during the year 2,029	
Died during the year 173	
	<hr/> 2,202
Number of patients remaining January 31, 1907	273
Maximum number of patients at any one time	285
Minimum number of patients at any one time	131
Daily average number of patients	218
Average number of days' stay of patients	32
Number of days' treatment given patients	79,532
Number of weeks' treatment given patients	11,362
Number of applicants for admission	2,940
Number of patients rejected	722
Patients carried in ambulances	1,920
Number of patients admitted over fifteen years of age	413
Number of patients dying within forty-eight hours of admission	54
Average age of patients	9
Percentage of deaths to total number of patients for the year	6.9
Percentage of deaths to discharges	7.8

The death rate from diphtheria for the year ending January 31, 1907, was	8.99
The death rate from diphtheria, deducting deaths within twenty-four hours of admission, for the year ending January 31, 1907	7.17
Number of days' board given persons	118,892
Number of weeks' board given persons	16,985
Total expenditures	\$95,725.12
Average weekly cost per patient	\$8.34

The expenditure upon this department has been \$95,725.12. If from this is deducted the difference in the amount of the stock on hand at the beginning and close of the year, which was \$1,006.15 more at the end of the year, it would give \$94,718.97. This sum was expended upon 2,475 patients, and, divided by 11,362 weeks' board, gives \$8.34 as the per capita cost per week. The cost of subsistence supplies was \$24,709.22; the total weeks' board for an average of 325 persons was 16,985. This gives a weekly cost per person for uncooked food supplies of \$1.45 per week, or 21 cents per day. This very small average cost is explained by the fact that 81 per cent. of the patients are children. There will be found on pages 51 to 53, inclusive, a detailed account of the expenditures of this department in the various sub-divisions, which are kept on the same general plan as the Hospital proper.

The most important occurrence of the year is the unusually large epidemic of scarlet fever. More cases of scarlet fever were reported to the Board of Health than in any year since 1893. The demand for admission was larger than for any previous year in the history of the South Department. The wards were crowded to the fullest capacity, and beyond proper hygienic conditions. Finally, no more patients could be admitted, and to meet the demand for the treatment of these cases the Board of Health, at considerable expense, cared for these patients at the Southampton-street Hospital, originally built for a hospital for cholera, but never used for that purpose.

There has been a marked increase in the amount of sickness among the nurses by reason of contact with infectious

diseases. It is to be expected that young women, mostly between twenty-three and thirty years of age, are more liable to infection than women more mature. It is, however, a matter of congratulation that none of these cases were fatal.

During the twelve years that this department has been in commission 27,367 patients have been received, nearly all ill with some infectious disease.

At a meeting of the Trustees on January 9, 1907, the Trustees put upon their records: "Resolved, that public necessity requires the erection of an additional building for measles, the cost of which is likely to require \$75,000." This building for the treatment of measles has repeatedly been referred to in the reports of the Trustees, by the Visiting Staff and physicians of the city. The Trustees, in accordance with their vote, petitioned the Mayor and Honorable City Council for the above appropriation, and as the year closes we are practically assured of this addition.

The South Department affords practically the only opportunity where medical students, other than house doctors, and nurses in training can obtain practical teaching and observation of infectious diseases under the best of conditions. Large numbers of medical students have availed themselves of this opportunity with the greatest profit.

In the Trustees' report of last year attention was called to some of the great benefits that had been afforded the families, largely for their children, by the special opportunities for the treatment of infectious diseases. This becomes more and more evident each year. This department is well organized and officered; the nursing is supplied by nurses from the Training School during the second year of their training; the House Staff is detailed from the main Hospital for definite terms of service. So far as is applicable, the rules and regulations of the main Hospital obtain here.

The recommendations of the Trustees and Superintendent, made so many times, seem now likely to become effective, and there is reason to believe that during the coming year a new pavilion to be used as measles wards will be erected.

The statistics of the year will be found on other pages.

RELIEF STATION.

The following are the principal statistics for the year:

Number of ward patients treated	1,160
Number of out-patients treated	35,246
	<hr/>
Total patients treated	36,406
Largest number of out-patients treated on any one day	186
Number of major surgical operations	80
Number of deaths	138
Number of deaths within twenty-four hours of admission	83
Number of days' treatment given patients in the wards	2,287
Largest number of ward patients on any one day .	14
Smallest number of ward patients on any one day,	1
Average stay of ward patients in days	1.9
Daily average in wards	6.2
Number of ambulance calls	1,446
Number of ambulance trips for transfers	
of admitted patients to Hospital proper,	369
Miscellaneous ambulance trips	56
	<hr/>
Total ambulance trips	1,871
Number of patients transferred to Hospital proper,	642
Number of cases brought by police ambulances and patrol wagons	1,262
Total expenditures	\$35,854 14

This Relief Station has been in commission five years. The number of patients treated during its first year was 20,150, and during the present year 36,406, an increase of 35 per cent., amply proving the judiciousness of providing public relief of this kind in this section of the city. The absence of this Relief Station would remove a valuable aid to public service.

On April 11 the Boston Transit Commission officially notified the Trustees that a new two-track subway would be constructed, going through the basement of the Relief Station. This would destroy the heating plant, ambulance

stable and room, and nearly all other parts of the basement. This action of the Transit Commission was done by the right of eminent domain, according to Acts of Massachusetts. The Transit Commission informed the Trustees that if any land or part of the building belonging to the Relief Station was taken for the purposes of the subway, the Transit Commission would replace the same and make satisfactory restitution or reconstruction for damages done.

The Trustees requested the opinion of the Medical and Surgical Staff relating to the proposed changes by the Transit Commission, as affecting the building in its work and purpose. Their report was, in part, as follows:

The Relief Station of the Boston City Hospital, in Haymarket square, is a model hospital for a city of 50,000 inhabitants. It has been in use about five years, has worn well, and has done an increasing and enormous work for the injured and the sick. With light on four sides, and situated in the heart of traffic, it would be difficult to find as good a location.

The changes proposed by the Transit Commission will damage it in three ways:

First, the doing the work, which will impair its usefulness for months. Second, the taking away of its basement, which will destroy the heating service and very seriously weaken its ambulance service. Third, a permanent change in vibration and in noise.

As to these two last, we can judge only by what exists now, and by comparison. Adding the vibration and roar of three subway tracks through the basement to the two side tracks already existing, must more than double the vibration and the noise — probably treble them. This damage *now* is three-fold:

First, in hearing and examining the hearts and breathing of the injured and the sick accidents, instruments of precision are employed, and their accuracy is even now impaired. Second, in preventing sleep, which must be rendered trebly more difficult among the feeble and pain-stricken sufferers.

In delicate operations the vibration will be harmful; but not prohibitory.

It is now our opinion that the proposed changes will be a lasting and serious injury to this Hospital. So much so that it must raise the question whether it would not be wiser to abandon this *building* and seek another location.

At a meeting of the Trustees May 23, 1906, the following action was taken and spread upon the records :

With reference to the construction of the subway system under the Relief Station at Haymarket square, it was voted :

Whereas, It is proposed by the Boston Transit Commission of the City of Boston to construct, maintain and operate tracks underneath the Boston City Hospital Relief Station in Haymarket square, in extension of the present subway system, for all purposes which varying conditions may now or hereafter determine; and

Whereas, It is essential that a building used for hospital purposes should be as nearly free as possible from noise, vibration and dust; and

Whereas, The ill effects of the construction and maintenance of such tracks upon the Hospital and its efficiency more fully appear in a report of the Staff of the City Hospital made to its Trustees; and

Whereas, The plans submitted by the Boston Transit Commission involve not only danger from noise, dust and vibration to the Hospital, but also the taking away of the boiler plant, ambulance station, morgue and storerooms; and

Whereas, It is absolutely necessary that, especially for the purposes of a Relief Emergency Station, arrangements should be such as to insure the highest efficiency and expedition, without any impairment in the least of present advantages or conditions;

Voted: That it is the sense of the Trustees of the Boston City Hospital that no changes resulting from the construction, maintenance and operation of the subway under its Relief Station should be permitted, which will in any way affect the efficiency, harmony, economy, sanitation, or means of expedition in operation of the present plant; that it is the sense of the Trustees that it would be wiser to abandon the present location and build a new Relief Station rather than to allow the Relief Station to suffer in any way as above outlined.

Voted: That the boiler plant and stable be housed in an annex to the present building permanently, and that the subway be kept sufficiently low in elevation to minimize vibration and noise, so that any construction of the subway under the Relief Station and reconstruction of the Hospital building will insure, now or hereafter, however the subway may be maintained or operated, as efficient and economical a plant as the Hospital now possesses in its present Relief Station.

During the year, the Trustees conferred with the Transit Commission's engineers and our architects, in order to devise plans and acquire additional land, upon which to extend the Relief Station, in order to make good those parts of the building which the Commission proposed to use for their own purposes. No official action was taken during the last part of the year, except to study the situation.

The Trustees are fully in agreement with the foregoing opinion of the Hospital Staff, and are now of the opinion that the new subway proposed will, if carried out, make the building practically unfit for its present use, and may advise that it be abandoned as a hospital, looking to the City Council to furnish us with suitable accommodations elsewhere.

CONVALESCENT HOME.

The number of patients treated during the year was 446, who received 9,220 days' treatment, at an average weekly cost of \$7.19. While there are thirty-six beds for the patients, and the accommodations can easily be increased to forty without crowding, it has happened that the beds have never been all occupied. Patients prefer to go to their own homes, however poor they may be, than to go to a "home." So many institutions for all kinds of people are called "homes" that the name seems to handicap the intended benefits of this part of the Hospital work.

There has been no death, and the amount of medicines merely nominal, the treatment being dependent upon the country life and air under pleasant surroundings.

PATHOLOGICAL LABORATORIES.

The following is a summary of the work of this department for the year as shown by the annual report to the Trustees. Cultures were made in

Surgical diagnoses	1,063
Diphtheria bacilli for the South Department	10,703
Pathological bacteria	125
Bacteria from the wards	1,042
<i>Total of cultures made</i>	<i>12,933</i>

These enumerations do not convey to a layman the great amount of work made necessary to accomplish results. The Trustees, however, are aware that much good has resulted from the work of this department.

During the year eleven men were officially connected with the work of the laboratories, five receiving salaries. The others are house officers permanently connected. The clinical laboratory is used by every service in the Hospital, generally by house officers in clinical pathology.

These laboratories are largely used by the South Department, particularly in clinical bacteriology, as is shown by the foregoing tables.

Pathological material is sent from all departments of the Hospital, including the Out-Patient Departments and the Relief Station. This part of the work is of very practical importance in the Hospital, because it so often renders possible an exact diagnosis and indicates the line of treatment to be followed.

Research work has been carried on in the usual way, and the following are some of the subjects contained in the report of this department:

A Case of Pott's Disease in the Monkey. By E. E. Southard.

Cystic Aplasia of the Cerebral Hemispheres in an Idiot Child. By W. N. Bullard and E. E. Southard.

Diffuse Gliosis of the Cerebral White Matter in a Child. By W. N. Bullard and E. E. Southard.

A Study of Brain Infections with the Pneumococcus. By E. E. Southard and C. W. Keene.

Cerebral Seizures with Suboccipital Pain: Miliary Cerebral and Gross Vertebral Aneurysms. By W. D. Ruston and E. E. Southard.

A Case of Glioma of the Frontal Lobe with Invasion of the Opposite Hemisphere. By E. E. Southard.

The report of the Pathological Department contains much matter that is only interesting from the professional side, but we record a few facts that may be of interest as to its operations. It is true, furthermore, that the Laboratory can take much credit to itself for the constant demand made for all men who have been trained in it for a longer or shorter period. It has been found impossible to supply the demand.

BURNHAM MEMORIAL BUILDING.

In the annual report of last year was given an outline of the opinion of the Trustees in regard to the expenditure of the Burnham Fund. By the terms of the will of the late Lamont G. Burnham, at the time of his death a Trustee of the Hospital, he bequeathed to the Hospital "the sum of \$150,000 to construct and equip upon the Hospital grounds a building to be known as the Lamont G. Burnham Ward, for such uses and purposes as the Trustees of the Hospital shall, in their discretion, determine."

In accordance with views expressed in last year's report, the Trustees voted to place the Burnham Building on the site of Ward T and that the latter ward be razed; and this action was approved by His Honor the Mayor and the Visiting Staff of the Hospital. Several plans were presented and rejected, or subsequently modified. Proposals were publicly advertised, but for various reasons all were rejected. At the close of this official year proposals are again advertised, and it is expected that we shall be able very shortly to proceed with the construction.

EAST BOSTON RELIEF STATION.

At the close of the last fiscal year, after much enquiry and many visits to sites offered in East Boston for the purposes of an Emergency Station, the Trustees recommended the site known as the old Webb School-house on Porter street. This school-house had been condemned and abandoned for several years. After many legal formalities the land was finally purchased by the Hospital from the Schoolhouse Department for the sum of \$3,000. This property was acquired June 1, 1906.

As at first contemplated, it was understood that this was to be an ambulance station only, with suitable means of treating first injuries. For this purpose \$30,000 was appropriated, but upon the urgent demand of the City Council and the citizens of East Boston a somewhat more extensive building would seem to be required. It was finally decided to construct a building somewhat after the scope of the Haymarket Square Relief Station. This required an additional appropriation of \$28,000, making the total amount of \$58,000,

which amount it is believed will be sufficient to supply a building to the satisfaction of all concerned. Plans were finally decided upon, the old school-house razed, and the new building begun January 9, 1907. The construction will continue through the year.

THE HOSPITAL HISTORY.

The question of the publication of a history of this Hospital has been agitated for several years. Upon the recommendation of the Visiting Staff and their offer to assume the work and responsibility of the undertaking, the Trustees authorized the publication of such a book, which was edited by Drs. David W. Cheever, A. Lawrence Mason, George W. Gay and J. Bapst Blake. The volume presented a "History of The Boston City Hospital from its foundation (1861) until 1904." A majority of the Medical and Surgical Staff contributed papers that make up this volume. It is a book of 422 pages, containing 29 chapters or sections. It is copiously illustrated with plans, half-tone prints of numerous parts of the buildings, and portraits of those who at present are, or in the past have been, connected with the Hospital. The portraits of several who are dead were obtained with difficulty. Many facts as to dates, expenditures and historical events are accurate, and will serve as reliable data. The cost of this edition, including mailing, was \$1,604. On account of the expenditure involved in this volume the usual Medical and Surgical Report, issued annually, has been omitted this year.

MEDICAL AND SURGICAL STAFF.

The following are the changes in the Medical and Surgical Staff during the year just closed:

Charles W. Duval, M.D., First Assistant in Pathology; James S. Howe, M.D., Physician for Diseases of the Skin; George F. Harding, M.D., Physician for Diseases of the Skin; Zabdiel B. Adams, M.D., Assistant to the Physician for X-Ray Service; Elmer E. Southard, M.D., Second Assistant Visiting Pathologist; John W. Farlow, M.D., Surgeon for Diseases of the Throat; Samuel T. Orton, M.D., First

Assistant in Pathology; Fred B. Lund, M.D., Surgical Registrar; William N. Bullard, M.D., Physician for Diseases of the Nervous System; Robert L. Emerson, M.D., Assistant in Clinical Pathology; Marsena P. Smithwick, M.D., Assistant to the Physicians for Diseases of the Nervous System, have resigned their positions.

The following promotions have been made: Samuel T. Orton, M.D., from Second Assistant in Pathology to First Assistant in Pathology; Harold E. Robertson, M.D., from Second Assistant in Pathology to First Assistant in Pathology; Franklin S. Newell, M.D., from First Assistant Visiting Physician for Diseases of Women to Junior Visiting Physician for Diseases of Women; Ernest B. Young, M.D., from Second Assistant Visiting Physician for Diseases of Women to First Assistant Visiting Physician for Diseases of Women; Leo V. Friedman, M.D., from Third Assistant Visiting Physician for Diseases of Women to Second Assistant Visiting Physician for Diseases of Women; John J. Thomas, M.D., from Assistant Physician for Diseases of the Nervous System to Physician for Diseases of the Nervous System; Rockwell A. Coffin, M.D., from Assistant to the Surgeons for Diseases of the Throat to Surgeon for Diseases of the Throat.

The following new appointments have been made: Robert M. Merrick, M.D., Physician to the Convalescent Home; Henry F. R. Watts, M.D., Physician to the Convalescent Home; Arthur P. Perry, M.D., Assistant to the Physician for Diseases of the Skin; Townsend W. Thorndike, M.D., Assistant to the Physician for Diseases of the Skin; Harold E. Robertson, M.D., Second Assistant in Pathology; Henry Tolman, Jr., M.D., Assistant to the Aural Surgeons; Francis J. Keany, M.D., Physician for Diseases of the Skin; S. Burt Wolbach, M.D., Second Assistant Visiting Pathologist; Lawrence J. Rhea, M.D., Second Assistant in Pathology; Isador H. Coriat, M.D., Assistant to the Physicians for Diseases of the Nervous System; Herman M. Adler, M.D., Assistant in Clinical Pathology; John H. Blodgett, M.D., Assistant to the Physicians for Diseases of the Throat; William H. Lowell, M.D., Assistant to the Ophthalmic Surgeons.

The following temporary appointments have been made: Frederick W. Stetson, M.D., Assistant to the Physicians to Out-Patients, for six months beginning April 26, 1906; William Bradford Robbins, M.D., Assistant to the Physicians to Out-Patients, for six months beginning November 19, 1906; Isador H. Coriat, M.D., Second Assistant to the Physicians for Diseases of the Nervous System, for six months beginning June 25, 1906; Warren D. Ruston, M.D., Second Assistant to the Physicians for Diseases of the Nervous System, for six months beginning January 9, 1907.

Charles F. Moulton, M.D., Assistant to the Ophthalmic Surgeons, died April 24, 1906.

W. T. Councilman, M.D., George W. Gay, M.D., John G. Blake, M.D., and A. L. Mason, M.D., were reappointed as Advisory Staff of the South Department.

In May, 1906, the position of an additional assistant in the Aural Department was created. In addition to the changes in the staff enumerated, many temporary appointments for a few months have been made.

In February, upon the recommendation of the Senior Staff, the term of service for Medical and Surgical House Officers was changed from twenty-four to sixteen months.

GIFTS AND PERSONAL ASSISTANCE.

The Trustees are happy to extend their grateful thanks to those who have in various ways contributed to the welfare of the patients and the support of the Hospital. Various organizations have in many ways contributed in this beneficent cause. Much reading matter has been sent to the various departments and wards. All these are too numerous to enumerate, but as far as possible have been acknowledged personally or in writing.

A portrait of the late Dr. John Ware, formerly upon the Consulting Staff, has been received, the gift of Dr. Charles M. Green.

The sum of \$150 has been received, the same being income from the estate of E. L. Wyman.

There has been received from Dr. Charles Leeds, executor of the estate of the late William T. Bolton of Chelsea,

the sum of \$555.52 — \$500 being the bequest and \$55.22 accrued interest. The sum of \$55.22 was paid to the City Treasurer, as income, and \$500 was invested by him in City of Boston bonds to be known as the "Bolton Fund," the interest of which was for the general maintenance of the Hospital.

Mr. Edmund D. Codman was, in April, 1906, appointed a Trustee for the term ending April 30, 1911.

Respectfully submitted,

A. SHUMAN, *President*,
CONRAD J. RUETER, *Secretary*,
FRANCIS J. KEANY, M.D.,
EDMUND D. CODMAN,
TIMOTHY J. REARDON, M.D.,
Trustees.

REPORT OF THE SUPERINTENDENT AND RESIDENT PHYSICIAN.

THE BOSTON CITY HOSPITAL, January 31, 1907.

To the Trustees :

GENTLEMEN,— I have the honor to present herewith my annual report of the Hospital Department for the year February 1, 1906, to January 31, 1907, inclusive.

The Hospital is now near the close of its forty-third year. The following table shows the number of patients who have applied for admission and been treated at the Hospital proper during the last ten years :

	Patients examined for ad- mission.	Patients admitted.	Patients acciden- tally injured.	Number of out- patients treated.
From February 1, 1897, to Jan. 31, 1898. ...	10,999	7,916	1,359	22,712
From February 1, 1898, to Jan. 31, 1899.....	11,492	8,231	1,845	22,640
From February 1, 1899, to Jan. 31, 1900.....	11,557	7,945	1,427	26,288
From February 1, 1900, to Jan. 31, 1901.....	11,951	8,131	1,210	27,328
From February 1, 1901, to Jan. 31, 1902.....	12,080	8,083	1,091	28,635
From February 1, 1902, to Jan. 31, 1903.....	12,259	8,076	1,130	31,655
From February 1, 1903, to Jan. 31, 1904.....	12,636	8,150	953	34,734
From February 1, 1904, to Jan. 31, 1905.....	12,223	8,789	772	37,608
From February 1, 1905, to Jan. 31, 1906.....	11,463	8,643	738	38,650
From February 1, 1906, to Jan. 31, 1907.....	12,003	9,461	704	37,938

The total number of patients admitted to the wards since the beginning of the Hospital has been 229,777; and the number of out-patients has been 669,498.

NUMBER OF PATIENTS TREATED IN THE LAST TEN YEARS,
AND RATE OF MORTALITY.

	Number of Patients Treated.	Died.	Rate of Mortality.
1896-97, year ending Jan. 31, 1897.....	8,393	835	.099
1897-98, " " " 1898.....	8,382	852	.101
1898-99, " " " 1899.....	8,719	958	.109
1899-1900, " " " 1900.....	8,457	939	.111
1900-01, " " " 1901.....	8,578	992	.115
1901-02, " " " 1902.....	8,503	961	.113
1902-03, " " " 1903.....	8,462	875	.103
1903-04, " " " 1904.....	8,576	908	.105
1904-05, " " " 1905.....	9,236	976	.105
1905-06, " " " 1906.....	9,109	1,012	.111
1906-07, " " " 1907.....	9,877	1,159	.117

Patients admitted to the Hospital according to services:

Medical services	3,592
Surgical services	4,414
Gynæcological service	1,157
Ophthalmic service	145
Aural service	153
Total	<u>9,461</u>

Number of visits of patients to the Hospital for advice
and treatment in the Out-Patient Departments:

Medical diseases	13,782
Surgical diseases	75,764
Diseases of the eye	5,578
Diseases of the ear	4,149
Diseases of the skin	3,271
Diseases of women	3,499
Diseases of the nervous system	4,617
Diseases of the throat	6,604
X-Ray treatment	2,492
Surgical out-patients treated in the accident rooms, and not included elsewhere	4,821
Total	<u>124,577</u>

NUMBER OF VISITS MADE BY OUT-PATIENTS TO HOSPITAL.

Year.	MONTH.	Medical.	Surgical.	Eye.	Ear.	Skin.	Women.	Nervous.	Throat.	X Ray.	Total.

The tables of disbursements in this report show the expenditures of the Hospital Department during the fiscal year, February 1, 1906, to January 31, 1907, inclusive. Table No. 1 shows the disbursements, by departments, according to the general subdivisions, and includes statistics of the departments, divided into the Hospital proper, Out-Patient Departments, Pathological Department, X-Ray Laboratory and Photographic Department, Settlement Account, South Department, Relief Station, Convalescent Home and New Buildings. Table No. 2 shows the disbursements for the year in the same departments, itemizing the various subdivisions, and includes, for all practical purposes, the quantity, cost and average price paid for the various items.

The total expenditures during the fiscal year for the Hospital Department, in its various branches, have been \$487,034.22, and the disbursements have been made as follows:

The Hospital proper	\$315,785 53
Out-Patient Departments	15,477 72
Pathological Department	9,785 20
X-Ray Laboratory and Photographic Department,	4,440 74
Settlement Account	462 68
South Department	95,725 12
Relief Station	35,854 14
Convalescent Home	9,465 09
New buildings	38 00
Total	<u>\$487,034 22</u>

The main Hospital has four subdivisions, the Hospital proper, Out-Patient Departments, the Pathological Department and the X-Ray Laboratory. In computing the *pro rata* cost per patient, per week, the cost of the Pathological Department is included in that of the Hospital, and for executive reasons is tabulated separately in order to show the cost of running that department. The expenditures for the South Department for infectious diseases and the Convalescent Home are kept in separate tables.

The expenditures upon the Hospital proper were for the care of 9,877 patients in the wards for 163,337 days' or

23,334 weeks' board, which makes an average weekly cost of \$13.74, or a daily cost of \$1.96, for patients of all classes. The net cost per patient, per week, to the city was \$9.80. The cost of uncooked food supplies for all persons, including patients and the entire household at the Hospital proper, was \$94,846.77. The average number of patients was 448; of officers and employees, including house and nursing staff 384, or a total daily average of 832 persons. The number of weeks' board for all persons was 43,378, and the weekly cost, per person, for uncooked food supplies, was \$2.18, or 31 cents per day.

The maximum number of patients in the Hospital on any one day was 504, as against 545 in the previous year. The minimum number was 379, in comparison with 334 for the previous year. The daily average during the year was 448, and the average length of stay was $16\frac{5}{10}$ days.

There have been treated in the various Out-Patient Departments 37,938 patients, at a cost of \$15,477.72. Other statistics, found elsewhere, include the number of out-patients, number of their visits, rate of mortality, work of ambulances, census of days' board for all persons, and the nativity of patients admitted and physical condition of patients when discharged.

The total number of deaths from February 1, 1906, to January 31, 1907, was 1,159. This does not include the statistics of the South Department, but only the main Hospital.

Of the deaths, there occurred within 48

hours of admission	449	or	$4\frac{5}{10}$	per cent.
Other deaths	710	or	$7\frac{2}{10}$	"
Total	1,159	or	$11\frac{7}{10}$	"

the rate of mortality for the year ending January 31, 1907.

This percentage of deaths is for the total number of patients treated in the Hospital. The deaths occurring within 48 hours of admission (449) were $38\frac{7}{10}$ per cent. of the whole number of deaths, 1,159.

During the year 9,877 patients were treated in the wards, 37,938 as out-patients, 446 at the Convalescent Home, 2,475

at the South Department; and at the Relief Station, 1,160 were treated in the wards, and 35,246 as out-patients—a total of 87,142 who have received the benefits of the Hospital in all departments.

During the year 12,003 persons applied for admission. Of this number 9,461 were admitted and 2,542 were rejected, the latter being 278 less than last year. The number rejected was 21 per cent. of all persons applying, and the causes of rejection appear in the table of applicants not admitted, on page 43. Of the number applying, 1,153 either changed their minds or were admitted later; of these, 608 were received within three days after application and 108 admitted still later. There were 44 applicants rejected for want of vacant beds, but of these 22 were admitted later. There were 659 of these applicants who could be treated more properly in the various Out-Patient services, without the additional cost of receiving them in the wards. Admission was denied to 227 for lack of information that they were suitable cases, but 115 were admitted later; and 70 were rejected as apparently incurable or unsuitable for treatment here. Various other causes of rejection appear in the tabulated form on page 38.

The total expenditures in the Hospital Department have been \$487,034.22, but the net cost to the city for maintaining the Hospital proper was only \$228,303.42.

South Department.—The total expenditure for the South Department was \$95,725.12, against \$95,996.49 for the previous year; and allowing for the difference in stock at the beginning and close of the year, the sum of \$94,718.97 represents the cost of maintenance for the fiscal year. The *per capita* weekly cost at the South Department was \$8.34.

Out-Patient Services.—The expenditure in the various Out-Patient services was \$15,477.72.

Convalescent Home.—The cost of maintenance for the Convalescent Home was \$9,465.09. The daily average was $25\frac{3}{10}$ patients, and the average weekly cost \$7.19.

The deductions from the foregoing statistical table show the following facts: The number of patients admitted and treated was considerably larger than any previous year except the last, and then only a trifle less. The number of out-patients treated (38,650) was larger than any previous year. The number treated at the Relief Station (29,390) was larger than in any previous year. The total number treated in all the departments (80,295) was the largest in the history

of the Hospital. The average length of stay ($16\frac{8}{10}$) was much shorter than any previous year. Ten years ago it was 20.20 days. The number of visits of out-patients was 124,633. The number of patients transported by ambulances was 7,916.

The depreciation upon the thirty-three buildings is always large, and is an important item of expenditure, the total amount being \$28,063.66, Table 1 showing upon what department such expenditures have been made. The items will be found on page 46.

The enumeration of them would be tedious, but the following are some of the more important items: Repairs of heating and power plant, \$4,636; new watch clock and rewiring all buildings, \$1,646; plumbing, \$2,929, including entire renewal of plumbing at Nurses' Home after thirteen years' use; a school-room and practice room for the training school pupils; repainting seven buildings outside and many rooms and corridors inside; a shelter-house for men patients upon the lawn beyond Wards W and X. The roads and walks about the Hospital grounds have been reinforced and much shrubbery added.

The Vose House has been painted exteriorly, and the reception room, at a cost of \$723. The administration building has been partly painted, exteriorly. Several months' work has been given to the repairs of furniture and painting throughout nearly all the buildings. New floors have been laid in several of the duty-rooms of the wards, after forty years' use. The depreciation in the heating and engineers department annually requires much thought and money. The work of repairs is never finished in so large an institution as this. More statistics may be found in Table 1 on page 46.

The repairs at the South Department have not been large outside the jobbing work of one carpenter and painter. The main stairway from office floor of the administration building to lower floor has been torn out and a new stairway constructed in its place. The roads about the south end of the grounds have been renewed at an expense of \$1,158.

The mortuary and chambers for women have been repainted at a cost of \$515.

The repairs at the Relief Station have not been expensive. Some changes in the heating system have been made, at a cost of \$397. The largest single item of repairs is \$387.37, for repairs to ambulances, on which the wear and tear is very great.

The statistics of the Convalescent Home, which has just completed its sixteenth year, are as follows :

Number of patients in Home at the beginning of the year,	
January 31, 1906	19
Admitted during the year	427
<hr/>	
Total treated during the year	446
Discharged during the year	419
<hr/>	
Number remaining in Home January 31, 1907	27
Largest number on any one day	36
Smallest number on any one day	15
Daily average number of patients	25.3
Average length of stay in days	20.7

The ambulance service has grown to large proportions and is one of the most useful portions of the Hospital business. There are now 11 ambulances and 4 other vehicles, 10 horses and 8 ambulance drivers. Such has been the improvement of the service in size, efficiency and dispatch, that it has become probably the largest connected with any general hospital in the United States.

New and improved patterns of ambulances, additional horses and new styles of harnesses and general trappings are now installed. A fire-alarm gong has been installed in the Ambulance Station, that ambulances may run to a second call in our own district, and to a third call anywhere in the city proper. A signal service has been arranged, so that when a Hospital ambulance, a police ambulance or other vehicle brings a patient to the front gate, the administration office and one of the three general divisions of the Hospital are notified that a patient is coming in. By this means,

litters and stretchers will be ready at the door when the patient arrives, and the proper house officer signalled for immediate assistance. There is also a wagonette, which is used for taking patients from the Hospital and South Department to the Convalescent Home, a coupé for sending for surgeons, besides delivery wagons for the transfer of laundry clothing and other minor details of administrative work.

The Relief Station at Haymarket square has its own ambulance service, which is even better arranged than that at the main Hospital. The number of patients transported during this year was: at the main Hospital, 4,125; at the South Department, 1,920, and at the Relief Station, 1,789; a total of 7,834.

LIBRARIES.

Medical Library.

Number of books in library, February 1, 1906 . . .	3,333
Number added during the year: by purchase 60, by donation 38	98
Number in library, January 31, 1907	3,431

During the year there have been received 167 medical monographs and reprints, 186 hospital and health reports, and 618 periodicals. Of index cards to clinical records, 16,040 have been added, making a total of 246,370.

There are now permanent funds amounting to \$8,750, the income of which is expended upon the various libraries throughout the Hospital, as follows:

	Volumes.
Medical Library	3,431
Shuman Memorial Libraries	1,800
Nurses' General Library	858
Training School Library	202
South Department Nurses' Library	279
Convalescent Home Library	175
Relief Station Nurses' Library	135
Total volumes	6,880

The Training School for Nurses has now completed its twenty-ninth year. The changes in the nursing staff during the year have been as follows:

SUMMARY FROM FEBRUARY 1, 1906, TO FEBRUARY 1, 1907.

February 1, 1906, the number of nurses was . . . 149

During the year nurses have left as follows:

Have been graduated	49
Graduate head nurses resigned	17
Night Supervisor of Nurses died *	1
Pupils dropped for various causes	12
Probationers not accepted	28
Graduate special nurses withdrawn	4

Total vacancies 106

Number remaining	43
Graduates returned for positions	24
Pupil nurses readmitted	5
Probationers admitted	67
Graduate special nurses employed	3

Remaining January 31, 1907 142Nurses connected with the school, in the main Hospital,
January 31, 1907:

Assistant Superintendents of Nurses	4
Head nurses (third-year graduates)	9
Head nurses (second-year graduates)	16
Post-graduate nurse	1
Senior assistant nurses	25
Junior assistant nurses	34
Probationers	15
Graduate special nurse	1
	<u>105</u>

In the South Department, January 31, 1907:

Day Supervisor of Nurses	1
Night Supervisor of Nurses	1
Head nurses (second-year graduates)	5
Senior assistant nurses	20
Junior assistant nurses	2
Graduate special nurses	2
	<u>31</u>

Carried forward 136

*Pneumonia.

<i>Brought forward</i>	136
Relief Station:	
Head nurses (second-year graduates)	3
Senior assistant nurse	1
	— 4
Convalescent Home:	
Matron	1
Head nurse (third-year graduate)	1
	— 2
	—
	142

The Training School has graduated 49 nurses during the year, making a total of 920 since it was organized. Seventeen nurses have also completed the third-year course and received the *cum laude* diploma, making a total of 96 third-year nurses. The optional third-year course is now completed and has been replaced by an obligatory three-years' course for all pupils.

The history of these 920 graduates is as follows:

Superintendents of hospitals or training schools	38
Other responsible positions in hospitals	69
Private nursing, or positions involving nursing	482
Retired	90
Married	198
Dead	43
	—
Total	920

The Superintendent of Nurses and her assistants have given 246 class recitations at the Hospital proper, and 115 at the South Department, making a total of 361 during the year. The teacher of the preparatory class has had daily drills in the practice-room, and class instruction in the school-room. The school has received 37 lectures, on Friday afternoons, from members of the Medical and Surgical Staff and others. In the month of March there were 5 lectures on sociological topics to the third-year nurses and the under-

graduates, as follows: Mr. Edward T. Hartman, "The Work of the Civic League"; Mrs. Ellen H. Richards, "The Responsibility of the Intelligent Woman for the Existence of Standards"; Rev. Frederick B. Allen, "The Work of the Watch and Ward Society"; Mr. James P. Munroe, "Modern Educational Tendencies"; Dr. Charles Harrington, "The Movement for Pure Food." The third-year nurses have also received medical and surgical clinical lectures and a special course of lectures on obstetrical nursing.

Mrs. Boland Pequignot has given forty-one practical lessons in cooking to sections of ten second-year nurses.

Mrs. Gulli J. Callowhill has given sixty-two lessons in massage to classes of four pupils each.

The gifts of flowers, music, toys for the children and reading to the patients, also thirty tickets for patients' rides from the Boston Young Men's Christian Union, have been received.

The obligatory three-years' course has now been in operation a little more than a year, and it is too early to give an opinion on any benefits that may come from the change. From a limited observation it gives excellent promise of a great improvement not only to the pupils, but to the better nursing of the patients, the primary consideration of all hospital teaching. The scheme was outlined in last year's report, pages 69 and 70.

Thomas N. Stone, M.D., Acting Executive Assistant, was appointed Second Executive Assistant February 14, 1906. Mr. Greenleaf R. Tucker, Hospital Chemist, resigned March 1, 1906, and Mr. John Ferrin was appointed Chief Apothecary September 25, 1906.

Miss Elizabeth G. Mason, Night Supervisor of Nurses, died November 11, 1906, and Miss Mary L. Annis, Graduate Nurse, was appointed to the position. Mrs. Anna E. E. Rothrock, Substitute Second Assistant Superintendent of Nurses, was appointed Second Assistant Superintendent of Nurses March 17, 1906.

At the South Department, Albert E. Steele, M.D., Assistant Resident Physician, resigned December 9, 1906, and Edwin H. Place, M.D., was appointed to the position.

At the Relief Station, William Stickney, M.D., Resident Surgeon, resigned August 18, 1906, and Edwin L. Drowne, M.D., was appointed to the position.

In presenting my twenty-eighth annual report to the Trustees, I beg to renew my cordial acknowledgments for their personal kindness and official support.

I have the honor to be,
Your obedient servant,

GEORGE H. M. ROWE, M.D.,
Superintendent and Resident Physician.

BEQUESTS.

GOODNOW FUND. — **ELISHA GOODNOW** of South Boston, who died in the year 1851, bequeathed to the city "all the rest and residue of my estate, real and personal, not otherwise disposed of," for the purpose of establishing in the Eleventh or Twelfth Wards of the city a hospital for the sick; one-half of said fund to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the officers of the government of said Hospital for the time being. Under this will the city came into possession of \$26,000 for the support of free beds.

NICHOLS FUND. — **LAWRENCE NICHOLS**, who died in September, 1862, made a bequest to the city of the sum of \$2,000 for "the establishment and endowment of a City Hospital."

NORCROSS FUND. — 1868, January 1. The Trustees received the sum of \$2,000 from Hon. **OTIS NORCROSS**, as the foundation of a fund for the benefit of patients leaving the Hospital poor and destitute of proper clothing.

Balance on hand February 1, 1906	.	.	.	\$22 80
Received interest	.	.	.	80 00
				<hr/>
				\$102 80
Expended	.	.	.	72 44
				<hr/>
Balance January 31, 1907	.	.	.	\$30 36

BALL FUND. — 1870, April 1. The Trustees received from the estate of Mr. **JONAS BALL** the sum of \$1,000 for the same purpose, and under the same restrictions, as the Norcross Fund.

Balance on hand February 1, 1906	\$50 83
Received interest	40 00
	<hr/>
	\$90 83
Expended	12 50
	<hr/>
Balance January 31, 1907	\$78 33

GOODNOW LIBRARY FUND.—1874. Donation of GEORGE GOODNOW, the interest of which is to be expended annually by the Board of Trustees in replenishing the library of the Hospital with books and pamphlets suitable for the reading of the patients during convalescence.

Balance on hand February 1, 1906	\$36 92
Received interest	40 00
	<hr/>
	\$76 92
Expended	33 10
	<hr/>
Balance January 31, 1907	\$43 82

SHAW FUND.—1875. Bequest of the late MARY LOUISA SHAW, the income of which is to be expended by the Trustees for the purchase of flowers and fruit for the use and comfort of the patients in the Hospital.

Balance on hand February 1, 1906	\$77 65
Received interest	70 00
	<hr/>
	\$147 65
Expended	61 84
	<hr/>
Balance January 31, 1907	\$85 81

PERKINS FUND.—1889. Bequest of the late MARY G. PERKINS, the income of which is to be expended for books for a medical library at the Hospital, and for the purchase of artificial limbs and surgical appliances for the use and relief of patients leaving the Hospital.

THE BOSTON CITY HOSPITAL.

The "Act to incorporate the Trustees of the City Hospital of the City of Boston" (see Acts and Resolves, 1880, chapter 174, approved April 7) provides that "money received by it shall be invested by the Treasurer of the City of Boston under the direction of the Finance Committee of said city; and all securities belonging to said corporation shall be placed in the custody of said Treasurer; *provided*, always, that both the principal and income thereof shall be appropriated according to the terms of the donation, devise or bequest, under the direction of said corporation."

HOUSE RULES.

WITH RULES FOR ADMISSION, GOVERNMENT AND DISCHARGE
OF PATIENTS; ALSO RULES FOR VISITORS.

HOUSE RULES.

The doors and gates of the Hospital will be closed at 10 o'clock in the evening, at which time all inmates shall be quiet and all not on duty shall be in their rooms, unless otherwise specifically permitted.

All officers, nurses and employés of the Hospital, when going and coming to and from the Hospital, shall enter and go out by the Entrance Office, and by no other entrance. Such officers and employés as are required shall use the time register and method of booking that the Hospital rules require.

A record shall be kept of all persons entering the Hospital between the hours of 10 o'clock in the evening and 7.30 o'clock in the morning.

No employé shall be absent from the Hospital except when permitted by special rules or by the Superintendent.

No officer, nurse, orderly or other employé shall directly or indirectly receive money or other gifts from or in behalf of patients, except with the approval of the Superintendent.

The use of tobacco, wine and intoxicating liquors is prohibited within the Hospital, unless prescribed by the Physicians or Surgeons.

All profane and improper language, loud talking and incivility are prohibited.

All employés shall observe such further rules and directions for their conduct as may from time to time be established.

ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the Hospital on each day of the week, Sunday excepted, between 9 o'clock A.M. and 6 o'clock P.M.

Whenever able, a patient shall apply in person for admission; when not able to apply in person a patient may be admitted on application made in his behalf, or upon visit at his residence by the admitting Physician.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Patients may be admitted to the privileges of the Hospital at such rates of board as the Trustees may, from time to time, by vote determine; payment for such board being secured by the friends of the patients or by the authorities of the cities or towns to which the patients belong.

Whenever in the opinion of the Trustees the circumstances of the patient will warrant it the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital, are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

No person having acute venereal disease or alcoholism shall be admitted except as a paying patient.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms which are deemed capable of being relieved.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the Hospital.

Patients shall be in their proper places in the wards during the visits of the Physicians and Surgeons, and always before 7.30 o'clock in the evening, unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing, and perform such other services as may be reasonably required of them.

No patients shall leave the Hospital grounds without a pass from the Superintendent, nor leave his ward without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him, any article of food whatsoever, or any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of a particular religious rite shall be granted when practicable.

Complaints, for whatever cause, may be made to the Superintendent, and whenever requested shall be by him reported to the Trustees.

DISCHARGE OF PATIENTS.

Patients shall be discharged by the Superintendent.

Patients discharged on the recommendation of the Visiting Physicians or Surgeons shall be provided with a certificate, stating their condition at the time of discharge, whether cured, relieved or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the approval of the Superintendent, a written statement to that effect shall be required from any person assuming the responsibility of the removal.

VISITORS.

No person shall visit any part of the premises except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

Daily, from 2 to 3 o'clock in the afternoon, friends may be permitted to visit patients, though no patient shall receive more than two visitors at that hour; and from 6 to 6.30 o'clock on each week day friends may be permitted to visit patients, though no patient shall receive more than one visitor at that hour. In all cases, however, the Trustees and Superintendent may exercise discretionary powers as to excluding or admitting visitors.

When visitors are admitted outside of the regular visiting hours they shall not be permitted to remain more than half an hour, except a special permission to remain for further time is granted.

All visitors shall leave the Hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the Hospital, or pass the night therein, without permission of the Superintendent or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left at the Entrance Office.

SPECIAL RULES FOR THE GOVERNMENT OF THE SOUTH DEPARTMENT.

The department of The Boston City Hospital located on the westerly side of Massachusetts avenue shall be designated as the South Department of The Boston City Hospital. It shall receive patients who require treatment for diphtheria and scarlet fever, and for other infectious diseases as may be determined from time to time by the Trustees.

The Superintendent of the Hospital shall, under the direction of the Trustees, have the general control and management of this department, in the same manner as of other departments of the Hospital.

The Rules of the Hospital shall, so far as applicable, and except as hereinafter provided, apply to the various officers and employés and to the conduct and management of this department.

SPECIAL RULES FOR THE GOVERNMENT OF THE RELIEF STATION.

The Boston City Hospital Relief Station is established not as a Hospital, but as a department of The Boston City Hospital for temporary relief, and the rules and methods prevailing now in the Hospital shall, so far as applicable, and not inconsistent with special rules, apply to the Relief Station.

The Station shall afford temporary relief in all classes of accident and disease. It shall be open at all hours for patients requiring treatment or attention. Patients requiring ward treatment, whether received at the Station or taken up in ambulances, shall, so far as consistent with their welfare, be forthwith transferred or carried to the Hospital for extended treatment, but ward accommodations shall be afforded patients whose condition is such that they cannot properly be transferred. Patients may, however, if it is deemed desirable, be transferred by the ambulances to other hospitals or to their homes. First treatment may be afforded at the Station, although the applicants are not such as require ward treatment.

The Superintendent of the Hospital shall have the general administration, management and control of the Station, the same as of other departments of the Hospital.

The Superintendent shall, from time to time, as may be necessary, nominate for confirmation by the Trustees a Resident Surgeon and one or more Assistant Resident Surgeons, and shall appoint and employ or detail for service in this department, subject to the approval of the Trustees or of the proper Committee, a Matron, a Supervisor, nurses, orderlies and such other minor employes as may be required for the proper conduct of the Station, who shall be subject to his supervision.

The various officers and employes of the Station shall perform such duties, other than those specified, as may be

required by the Trustees or the Superintendent, according to the nature of their respective duties. The Resident Surgeons, the Matron, Supervisor and such other officers as may be so required shall reside at the Station.

AMBULANCE SERVICE.

The ambulance service of the Station shall be under the direct control of the Resident Surgeon, and shall co-operate with that of the Hospital, with which it shall form one general system. Ambulances shall, in response to calls, be despatched from the Station or the Hospital, as the exigency may require. The utmost despatch shall be exercised in the ambulance service, so far as is consistent with a regard for the welfare of the patient and the interest of the public.

Ambulances shall in general be sent from the Station or the Hospital at least upon a general alarm to all fires occurring in the city proper, and in such further districts as may be determined upon.

An ambulance shall be held during the hours of the day in complete readiness to make immediate response to calls, and shall be kept in condition to make prompt response to calls at any time of the night.

A House Officer shall accompany the ambulance, shall direct its course and shall have direction of the care and treatment of the patient until received at his destination.

The foreman of the ambulance service at the Hospital Station shall visit and inspect the Ambulance Department of the Station from time to time, but the immediate carrying out of directions shall be under the Assistant Foreman at the Station.

PATIENTS.

Alcoholic and insane patients shall not be received unless there is surgical or medical complication making Hospital treatment absolutely necessary.

No patient, after being admitted to the wards, shall leave the Station until his discharge, without a pass from the proper officer, nor shall he visit other parts of the Station without permission.

Ward patients shall be discharged by the Superintendent or Resident Surgeon.

SPECIAL RULES FOR THE GOVERNMENT OF THE CONVALESCENT HOME.

The department of The Boston City Hospital, located on Dorchester avenue, in Dorchester, shall be known as the Convalescent Home, and shall receive such patients recovering from acute diseases as shall be transferred to it from the main Hospital for treatment during convalescence.

The Superintendent of the Hospital shall, under the direction of the Trustees, have the control and management of the Convalescent Home, in the same manner as of other departments of the Hospital.

The Superintendent shall appoint, subject to the approval of the Trustees, a Matron, and shall employ, under their direction, such further assistants as may be necessary for the proper conduct and service of the Home.

The Matron, under the direction of the Superintendent, shall have the immediate charge of the Home, and the control of all nurses and other employés and patients. She shall reside at the Home.

VISITORS.

Friends may be permitted to visit patients on week days, between 3 and 4 o'clock in the afternoon. In all cases the Trustees, Superintendent and Matron may exercise discretionary powers as to excluding or admitting visitors.

Visitors shall leave the Home and grounds at the expiration of the visiting hour, and shall visit no part of the Home or grounds other than the reception-room, except by permission from the proper authority.

No person shall give any article of food or drink to a patient, unless by permission of the Matron.

THE BOSTON CITY HOSPITAL TRAINING SCHOOL FOR NURSES.

The Trustees of the Boston City Hospital, in 1878, established a Training School for Nurses, the fourth organized in the United States, in order to give to women desirous of becoming professional nurses a systematic course of training and practice.

The Training School is controlled by the Trustees of the Hospital, like all other departments of the Hospital service. The Superintendent of the Hospital has the general supervision of all matters relating to the school, its course of work and study, lectures and discipline. The Superintendent of Nurses has the immediate charge of all the nursing in the Hospital, of all persons employed in the wards, and also the instruction and management of the nurses in the Training School. All female nurses in the Hospital must be connected with the school.

The Hospital in all its departments contains nine hundred and thirty-five beds for patients as follows:

Main Hospital	615
South Department for Infectious Diseases . .	264
Relief Station	20
Convalescent Home	36
<hr/>	
Total	935

The number and variety of cases in each department afford ample material for observation and instruction. The course requires three years, and includes general medical and surgical nursing, together with ophthalmic, aural and gynæcological nursing, also the nursing of children and infectious diseases, and of emergency surgical work. There are no maternity wards connected with the Hospital, but a course

in maternity nursing has been provided at maternity hospitals elsewhere, without extra cost to the nurse.

The most desirable age for candidates is from twenty-three to thirty-five years. They must be of sound health, and should send with their application a certificate from a physician certifying to the fact. They should also send a brief personal history, and give the names and addresses of three responsible persons, not of their own kin, preferably their last employer, if any, or business men of their acquaintance, who know of their good character and capabilities. Upon the recommendation of the Superintendent of the Hospital and Superintendent of Nurses, they will be received for three months on probation. The fitness of candidates for the training and work, and the propriety of retaining or dismissing them, will be determined by the authorities in charge of the school, under the direction of the Trustees. An entrance examination is given to all candidates before or during the term of probation. The examination is in Simple Arithmetic, English Composition and Writing from dictation, etc., and is in no sense so severe as to prevent any one who is capable of undertaking the work of a trained nurse from so doing. The Superintendent of Nurses will have a personal interview with candidates for the school on Tuesdays from ten to twelve o'clock.

At the end of the second month candidates, if considered satisfactory, are permitted to wear the cap and enter upon the regular course of training, but such candidates are not permitted to join the school formally until the end of the third month, when, if accepted, they sign an agreement to complete the prescribed course of three years, and to conform to all rules. At the end of the first six months the record and work of each pupil are carefully scrutinized as to her fitness to make a good nurse, and the right is reserved by the authorities of the Hospital to terminate then, or at any time, the connection of any pupil or nurse with the school, for inefficiency, misconduct, generally unsatisfactory record, or for any other reason which may be deemed sufficient.

The nurses in the Training School (including probationers) reside at the three Nurses' Homes connected with the

Hospital. These houses are attractive and homelike, and have the best of conditions necessary to good health and personal hygiene, while recreation and amusement necessary to a wholesome life have been considered in the music room, library and reception rooms provided.

The Superintendent of Nurses has the immediate charge of the Training School, under the authority of the Superintendent of the Hospital and of the Trustees, and the nurses are subject to the rules of the Hospital, like any other service.

The instruction includes the general care of the sick, the making of beds, changing bed and body linen, managing of helpless patients in bed, etc. ; giving baths, keeping patients warm or cool, prevention or dressing of bed sores and proper management of the patient under various conditions, with different diseases or injuries; the making and applying of bandages and rollers, preparation of splints, application and management of surgical apparatus, applying of fomentations and poultices, the dressing of burns, ulcers and wounds, and other minor dressings, cupping, leeching and subsequent treatment, the administering of enemata and the use of the female catheter.

Nurses are taught how to act in the various emergencies occurring in hospital and private nursing, as well as in the accidents of ordinary life. They are also given lessons in *massage* by a professional instructor. There is a systematic course of training in cookery for the sick, the serving of food and delicacies in the proper manner, and the feeding of helpless patients, or those who resist food.

Instruction is also given in the best practical methods of supplying fresh air, of warming and ventilating sick rooms in a proper manner, and the proper care of sick rooms for the best good and comfort of the patient; in keeping all utensils and appliances perfectly clean and disinfected; in making accurate observations of the pulse, temperature, respiration, expectorations, the secretions, state of the skin, and eruptions; of mental condition as to delirium, stupor, shock, etc.; of the condition as to sleep, appetite, effects of diet or of stimulants and medicines; the behavior of wounds and

the after treatment in surgical operations; and in the managing of convalescents. Nurses are taught the administering of medicines and the application of external remedies, how to take notes on cases, the making up of the nurse's record and the reports to the attending doctor.

The three years' course of training includes a preparatory course of three months, under a special instructor, followed by a fixed course of instruction from manuals and text-books, mainly given by the Superintendent of Nurses, the Assistant Superintendents of Nurses and graduate head nurses. Lectures and demonstrations, chiefly upon practical points, are given at stated times by the medical and surgical staff of the Hospital. While the instruction by the manuals, text-books, lectures, demonstrations, quizzes and models is considerable, the main reliance is upon accurate daily drill in the wards, operating rooms and other departments of the Hospital. Examinations, both oral and written, are held from time to time by the authorities of the school, and nurses will not be graduated unless they attain, on critical marking, at least seventy per cent.

The pupils are employed as assistant nurses in the wards, operating rooms, out-patient departments of the Hospital and the down-town Relief Station. They are given eight months' training in medical wards, eight months in surgical wards, six months in contagious wards, four months in gynecological wards, four months in a maternity hospital and from three to six months elective. No class recitations or lectures are given between July 1 and October 1, except to the probation class.

Probationers are not paid during their first two months, but for the remaining ten months of the first year they receive \$50, for the second year \$100 and for the third year \$150, to pay for the expenses of their uniform, personal clothing and other minor requirements. This sum is in nowise intended as wages, it being considered that their education during this time is a full equivalent for their services. When the term of three years is completed the nurses receive, if they pass all the examinations, and are otherwise satisfactory, a diploma certifying to the regular course of training and practice, and are then permitted to wear the graduate's badge of the school.

The majority of graduates engage in private nursing; but some are invited to remain in the service of the Hospital as head nurses, with opportunities of promotion here or in other hospitals. Graduate head nurses who prefer to remain in hospital work, or return after a term of private nursing, are given post-graduate instructions in ward management, hospital housekeeping and minor administration, fitting them to fill positions of trust in hospitals or other institutions.

The school year has no fixed date, but accepted candidates are, as a rule, received in classes beginning every three months. Those desiring to enter with less delay can sometimes anticipate a fixed date by placing themselves on the emergency list. When coming to the Hospital they should bring with them the following articles: Three gingham or calico dresses, made plainly; eight large white aprons, made of bleached cotton, two yards wide, meeting in the back, with bibs, without straps, plain at the top and gathered slightly at the bottom, two pearl studs on the band, two inches wide, with hem at bottom five inches in depth, and two inches from the bottom of the dress; two bags for soiled clothes, one pair of scissors, a pin-ball and a plain napkin ring with nurse's name; a good supply of plain underclothing—every article to be distinctly marked with pen and indelible ink with the owner's name. Twenty-one pieces are allowed for the laundry each week.

Nurses must bring suitable outer garments for stormy weather, and they are required to wear boots that will be purchased on prescription of our Orthopædic Surgeon, after coming to the Hospital. If the teeth are out of order in any way they must receive attention before coming for the probationary month. Nurses are required to wear the Training School uniform after they join the school. Material for dresses will be sold at cost price; caps are furnished at a nominal price. Probationers should come prepared, on acceptance, to expend about \$20 for uniforms, books and other needful expenses.

Hours of duty for day nurses will vary from six to twelve between the hours of 7 A.M. and 8 P.M.; for night nurses, from 8 P.M. to 7 A.M. No nurse is required to do both day and night duty on the same day, except in rare

emergencies. Each nurse on day duty is allowed one hour after 1.30 o'clock P.M., for rest and recreation, one half day after 1.30 P.M., each week, and four hours on Sunday. Two weeks' vacation with pay is allowed each year, and one week without pay as leave of absence during the third year. If nurses are sick they are cared for in the Hospital, but pay is stopped, except for illness or injury received in the line of duty. Pupils may be expected to have a percentage of any considerable time lost by illness or absence added to their three years, at the discretion of the management. Nurses on night duty are required to be in bed from 9 A.M. until 4 P.M. Nurses may be called upon for six months' regular night duty during the three years' training, besides "special cases" to a limited number.

COURSE OF INSTRUCTION.

I. PROBATIONERS' COURSE.

The first week the probation class meets in the Practice Room daily for practical instruction in the making of beds, including the use of bed rests, cradles, etc.

The care of rooms, sweeping and dusting.

Care of set bowls, wall stands and utensils.

Care of linen rooms, the folding of linen.

The use of hot and cold applications, including the making of fomentations and poultices.

The care of rubber goods.

The making of surgical supplies, pads, sponges, tampons, etc.

The use of slings, binders and supports.

During this time the class is instructed in the use of antiseptics, disinfectants and deodorants, and the preparation of solutions.

Tables of weights and measures.

The use of abbreviations and symbols.

The principles of ventilation.

The temperature of the body. Heat production and radiation.

The use of the clinical thermometer and charts.

The giving of baths, care of the back, mouth, etc.

From the seventh (7th) to the tenth (10th) day allowed to go to the wards, make beds, sweep, dust and fold linen (hours from 7 to 10.30 A.M.).

The tenth (10th) day assigned to wards for regular duty, and during the remaining weeks of the probation course three hours each day will be devoted to class and practice room work, with one additional hour for recreation.

Total Hours of Study and Ward Work in Three Months' Probation.

Anatomy, Physiology and Hygiene	66 hours.
Practical Nursing and Practice Room	126 "
Materia Medica and Nursing Ethics	24 "
Lectures	12 "
Ward Work	481 "

FIRST YEAR.

Fever Nursing. Wilson	12 recitations.
Principles of Nursing. Hampton-Robb	12 "
Lectures by Physicians and Surgeons	37
Ward Clinics: Medical, surgical, gynæcological and infectious.	

II. SECOND YEAR.

Nurse's Handbook of Obstetrics. Cooke	12 recitations.
Materia Medica	12 "
Special instruction in Bacteriology	6 exercises.
Instruction in Practical Asepsis in Operating Rooms.	
Massage	6 recitations.
Special lectures in Obstetrics	6
Obstetrical Course (4 months).	

III. THIRD YEAR.

Invalid Cooking	8 recitations.
Medical and Surgical Clinical Teaching by paid instructors.	
General Review of Course	12 recitations.
Elective work in Operating Rooms, Out-Patient Departments, Relief Station, Contagious Wards and Housekeeping Department.	

An excellent reference library is open to nurses for more extended reading upon subjects under consideration.

LIST OF LECTURES AND SUBJECTS.

A lecture is given to the Training School on Fridays, at 4 P.M., in the Operating Amphitheatre, by a member of the Medical and Surgical Staff, once a week between September 15 and June 30. The following are among the lectures given, at various periods during the training:

Three. — Theory of Wounds: modes of healing, granulations, ulcers, cellulitis, suppuration, sloughs, erysipelas, pyæmia, gangrene, sepsis, etc. (with stereopticon).

Six. — Bacteriology, brief history and general theory: micro-organisms; general distribution in air, water, etc. Elementary consideration of pathogenic and non-pathogenic micro-organisms. Exhibition of apparatus and cultures. Practical points for nurses.

Two. — Surgical anatomy and landmarks, hæmorrhages, etc.

One. — Fractures: varieties, preparation and care of splints and apparatus for treatment, management of cases, etc.

Three. — Medicines: avenues of taking; preparation of doses; classes of internal and external poisons; cautions; hospital formulæ.

One. — Nursing in Fevers: theory of fever, symptoms and course of, different plans of treatment, nurses' duties as to symptoms, bed, clothing, secretions, baths, food, and management of cases.

Four. — Infectious Fevers, especially diphtheria and scarlet fever: symptoms and course of disease; complications; infection and contagion; special nursing in croup, laryngitis, tracheotomy, intubation, etc.; management of patient and surroundings; personal hygiene of nurse in attendance, etc.

Two. — Symptomatology in disease: what and how to observe accurately; vital organs and special symptoms. The model sick-room; temperature, light, ventilation, care of bed, bedding and clothing, furniture, utensils, disinfectants, cleansing, dusting, etc.

Three. — Care of children in health and disease: diet and clothing of infants and children; various infantile diseases.

Two. — Physiology of pregnancy and labor: delivery and confinement nursing.

One. — On Gynæcological Nursing: preparation of patient for examination or operation; operations after treatment, douches, use of catheter, etc. (Demonstrations to sections of senior nurses in Ward S operating room.)

One. — Special nursing in nervous diseases, including the insane.

One. — Special nursing in diseases of the eye, and general care in health and disease.

One. — Special nursing in diseases of the ear, its care in health and disease; nurses' duties at operations and continued treatment in disease.

One. — Urine: characteristics, properties, including taking notes on same, and brief analysis. Drill in laboratory by classes in sections.

Three. — Visceral Anatomy: demonstrations by post-mortems; care of the dead, etc.

One. — Suggestions to those about to engage in private nursing.

Five. — Sociology. By leading workers in sociology.

11
